Ok. Not sure, if he'll simply call me or setup a conference call. Will let you know as soon as I find out.

Appreciate you being my eyes and ears at home. You ended up with a pretty crazy week of phones. The Gold King situation appears to be getting worse and worse, at least on the media side.

Pete,

I saw the note below and have a suggestion to assist with coordination with R9, especially if we are going to provide support remotely from Seattle.

I suggest that R9 request a Deputy RIC to serve as a coordinator and "manager" of the folks called up to conduct support work. This way, we can monitor the workload and help keep information flowing back to R9.

If you think this is a good idea, Chris or Wally can serve in this role until I get back from A/L on Friday.

They are seeking support in RUL and possibly FSC for the typhoon and/or the gold mine release. It would not involve travel, our folks could do the work from here. I'll send out a message soon to determine availability, but I wanted to write you first to let you know.
